## Clemtex Pipe Coating Equipment

Clemtex Heavy Duty Spray Coaters are designed to apply internal coatings and linings to pipe. These tools have a pneumatic driven spray head that will spray most all coatings from the thinnest to the most viscous. The coating to be applied is fed to the spray head through a fluid manifold for maximum material disbursement. All tools include pipe centering carriages. These tools will spray the internal diameter of pipe from 3" to 36".

- HDCBX-360-6 Spray Coater with a 6" head sprays 12"-36" ID pipe
- HDCBX-360-4 Spray Coater with a 4" head sprays 8"-17" ID pipe
- HDCBX-360-3 Spray Coater with a 3" head sprays 5"-12 ID pipe
- HDCBX-360-2 Spray Coater with a 1½" head sprays 3"-5" ID pipe
- HDCBX-360-112 Spray Coater with a 1½" head sprays 2"-5" ID pipe

These Coating Tools are generally fed paint by a pressure paint tank or an airless spray pump. Consult Clemtex for the appropriate delivery system for your specific coating to assure an even and consistent dry film thickness throughout the pipe. All Internal Coating Tools are in stock and ready for immediate shipment.
